

SAS-NSTC Joint Research Projects						
ID	SAS principal investigator	Acronym	Title of the project	SAS institute/centre	Period	Call
SAS-NSTC/ JRP/2023/773/MULTICOMP	Jozef Kollár	MULTICOMP	Utilizations of multicomponent reactions and reversible-deactivation radical polymerizations: Promising tools for the preparations of advanced polymer materials	Polymer Institute	1.1.2024-31.12.2026	Call
SAS-NSTC/ JRP/2023/773/LipAI	Mária Balážová	LipAI	Lipid Regulation for Anti-Inflammatory Therapy	Centre of Biosciences	1.1.2024-31.12.2026	Call
SAS-NSTC/ JRP/2024//EMERGE	Mária Bučková	EMERGE	Exploitation of enviromental microbiota and its genetic resources for the development of innovative and sustainable biosorption solutions of rare earth elements (REEs)	Institute of Molecular Biology	1.1.2025-31.12.2027	Call
SAS-NSTC/ JRP/2024//SUPRA-SIGHT	Katarína Šipošová	SUPRA-SIGHT	Exploring Protein Amyloid Superstructures and Dynamics Using Single-Molecule Microscopy with the Deep-Learning Modeling	Institute of Experimental Physics	1.1.2025-31.12.2027	Call
